Dose Flip

The Dose Flip is a smart pill box that helps individuals take the right medicine at the right time. At the scheduled time, the Dose Flip will sound an alarm and flash a light to alert the individual. To dispense the pills, the device is simply flipped and pills are released. The Dose Flip is small enough to be carried around but large enough to fit medications. Each compartment holds a large number of medications (e.g. 7 multivitamins or 22 aspirin size tablets). The device is easily set up following the on screen prompts. Additionally, some pharmacies will fill medications directly into the Dose Flip trays. In order to eliminate taking medications at the wrong time or, medication abuse, the device can also be locked so, that medications can not be accessed unless it is the appropriate time. The Dose Flip has several adaptive options including a stand, adaptive flipper, extra trays, and refilling disk. Additionally, the Dose Flip can be set up to alert caregivers or loved ones if medications are not being remembered or taken as directed. Notifications can be sent via phone call, text message or, email.

FOR MORE INFORMATION

If you think this device may be beneficial to you, please contact your SSA and request an individual consult. If you are a provider seeking training or consultation contact us at (419) 782-6621.
