

Quip Adult Electric Toothbrush

Oral health is a big deal - and the right technique makes all the difference. The quip Toothbrush has a 2-minute built-in timer for a complete routine + 30-second pulses for an even clean. Soft bristles help clean tight spaces and sensitive teeth and gums with gentle sonic vibrations for a safe, effective electric toothbrush for adults. Keep your smile healthy & plaque-free

Dentists recommend replacing brush heads every 3 months before bristles wear out and no longer brush properly.

Created with Dentists & Designers: We design products that guide good oral care habits (and exclude the gimmicks that don't), to simplify a healthy routine. Simplify even further with our verified quip Brush Head Refills
