# Smart Plug

There are many brands of smart plugs but they all allow you to turn various wired appliances with on/off switches into automated ones. These appliances can then be controlled with your phone or with voice commands. These plugs connect to your Wi-Fi network and can be controlled on a smart device, such as your phone. Additionally, smart plugs can connect with your Google Home or Amazon Alexa devices, allowing you to use voice commands to control your appliances.

What can you do with a smart plug:

- You can schedule things to turn on at certain times.
- Can control appliances remotely.
- Outdoor smart plug can be placed outside to control things on your patio.

## FOR MORE INFORMATION

If you think this device may be beneficial to you, please contact your SSA and request an individual consult. If you are a provider seeking training or consultation contact us at (419) 782-6621.
